

SUPPLEMENTARY FIG. S2. Changes in NOX1 expression with age in the aortic wall of 4- and 16-month-old *ApoE*^{-/-} and *ApoE*^{-/-}/*p47phox*^{-/-} mice and in VSMCs from 4- and 16-month-old wild-type and *p47phox*^{-/-} mice. (A) Representative aortic sections were stained for immunoreactive NOX1 and with Oil Red O. Scale is 100 μ m. (B) Real-time reverse transcription–polymerase chain reaction analysis of VSMC *Nox1* mRNA levels. NOX, NADPH oxidase.
