

SUPPLEMENTARY FIGURES

Supplementary Figure S1: UBE2T promotes proliferation of LNCaP cells. **A.** Western Blot analysis of UBE2T levels in LNCaP cells overexpressing UBE2T. **B.** MTT assay showed the obviously increased proliferative rate of LNCaP cells with expression of UBE2T. **C.** Colony formation assay demonstrated an increase in the number of clones by overexpression of UBE2T in LNCaP cells. ** $P < 0.01$ based on the Student t test. Error bars, SD.

Supplementary Figure S2: UBE2T promotes migration and invasion of LNCaP cells. **A.** Western blot analysis of EMT markers in LNCaP cells with overexpression of UBE2T. **B.** Wound healing assay revealed a faster wound healing rate in LNCaP overexpressing UBE2T. **C.** LNCaP cells overexpressing UBE2T possessed more migrating ability in transwell assay and more invading ability in matrigel assay. Scale bars: 100 μ m (B) and 50 μ m (C) ****** $P < 0.01$ based on the Student t test. Error bars, SD.
