

S2 Fig. Effect of media composition on growth of the *pmr1-Δ* mutant (A) and on sensitivity of *H. polymorpha* cells to MnCl₂ (B). Cell suspensions with equal densities were serially diluted (10-fold) and spotted onto corresponding media. *pmr1-Δ*, subclone of the 1MA27/12/GP1 strain lacking the *PMR1* containing plasmid; *PMR1*, 1MA27/12/GP1 strain. Only two most representative dilutions are shown in the panel B.
