

Figure S1 - Antagonistic activity of endophytes against phytopathogenic fungi after 3 d. (A) Inhibition of *M. grisea* MG01 by endophyte strain 130; (B) inhibition of *F. oxysporum* FO02 by endophyte strain 124; C. inhibition of *A. alternata* AA03 by endophyte strain 132. A', B', and C' were control pathogenic fungus fungal colonies without endophytes.
