S2: Terminal frequency differences between jammed and jamming bats. Relative terminal frequency between jamming and jammed bats when jammed by conspecifics for call durations of 2-4ms.

Bat	Terminal frequency (kHz) (mean±sd)	Jammed by Bat	Average frequency of jamming bat compared to jammed bat
1	36±0.9	4	Higher
2	35.1±0.7	3	Equal
3	35.2±0.6	4	Higher
4	37.4±0.4	3	Lower
