

Figure S9 (related to Figure 6). Vitamin B12 supplementation does not rescue growth defect of *LprG-Rv1410* mutant in propionate. The indicated strains were cultured in 10 mM propionate as described in the materials and methods with or without the addition of +/- 0.5 µg/mL vitamin B12 (VitB12; dashed lines) at 37°C with shaking. Growth measured by OD 600, mean +/- standard deviation.
