

Concentration-Independent MRI of pH with a Dendrimer-Based pH Responsive Nanoprobe

Mohammed PI. Bhuiyan^[a], Madhava P. Aryal^[a], Branislava Janic^[a], Kishor Kitar^[a], Nadimpalli RS. Varma^[a], James R. Ewing^[a], Ali S. Arbab,^[b] and Meser M. Ali^{*[a]}

Supplementary Section:

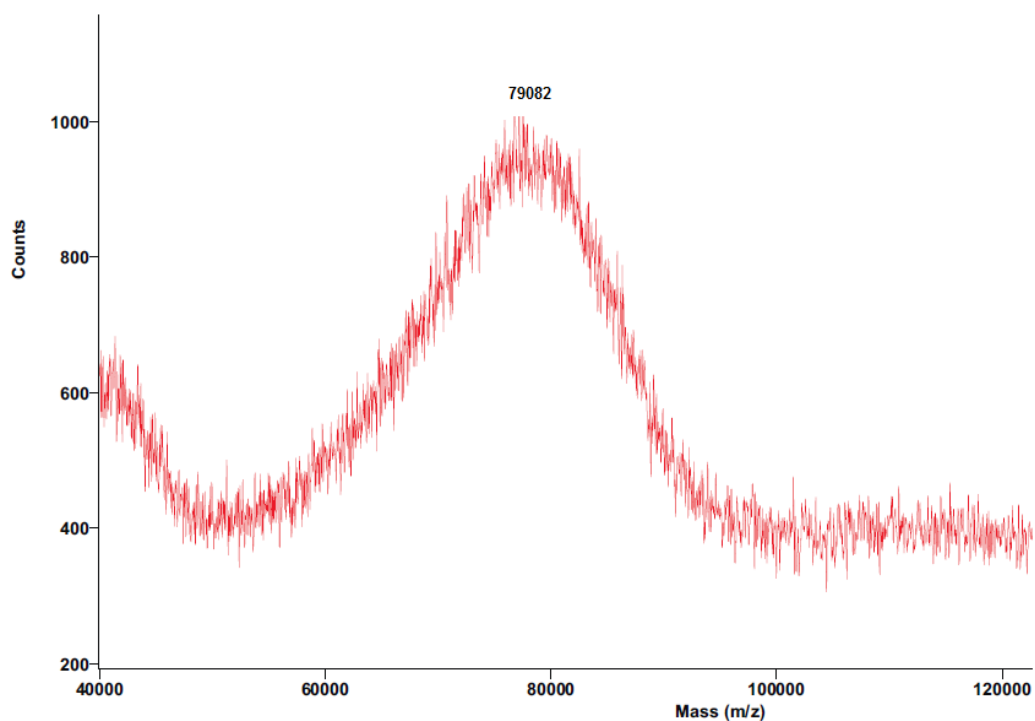

Figure S1: Maldi-tof analysis of (p-SCN-DOTA-4AmPE)^[45] conjugated G5 PAMAM dendrimer. The average number of conjugate DOTA-4AmPE chelates was estimated to be 44 per dendrimer.
