

Supplemental Figure 3

Supplemental Figure 3: Sexual dimorphic inflammatory gene expression in WT C57bl/6J mice and GR^{fl/fl} mice. **(A)** Quantitative PCR for estrogen receptor and androgen receptor in male and female GR^{fl/fl} mice and LGRKO mice. Data are expressed as relative mRNA to PPIB ± SEM; n=3. **(B)** Venn diagram of sexually dimorphic inflammatory genes in C57bl/6J mice and GR^{fl/fl} mice. **(C)** Top 10 canonical pathways identified by IPA of Nanostring data in GR^{fl/fl} mice and LGRKO mice **(D)**.
