* SLEDAI: renal domain score of the Systemic Lupus Erythematosus Disease Activity Index. Sum of the SLEDAI item scores for proteinuria > 0.5 gram/day, hematuria and pyuria (both > 5 cells/HPF and cellular casts

** SDI: Systemic Lupus International Collaborating Clinics-Damage Index (score = 0 to maximum of 5). Based on glomerular filtration rate (GFR) < 50%, presence of end stage renal disease and proteinuria > 3.5 gram/day

SLICC-RAS: Systemic Lupus International Collaborating Clinics-Renal Activity Score. Includes the SLEDAI-R items, except for cellular casts, scored on Likert scales

† BILAG: renal domain scores of the British Isles Lupus Assessment Group index. Sum of the BILAG item scores for proteinuria > 0.5 gram/day, hematuria and pyuria (both > 5 cells/HPF), cellular casts, blood pressure, the presence of accelerated hypertension, nephrotic syndrome, raised plasma creatinine concentrations, decreased GFR and for a kidney biopsy showing LN in the preceding 3-month period
