

Figure S2. Pax3-expressing cells in the internal granule layer of the cerebellum. Co-immunofluorescence of wildtype P3 mouse cerebellum for Pax3 and Nestin-CFP (using a GFP antibody) (A), Sox2 (B), and Ki67 (C). DAPI counterstain is shown in (A'-C') to indicate total nuclei. 20x magnification, scale bar is 50 μ m. White arrows point to double positive cells.
