

Supplementary Table S1: Univariate analysis of factors associated with overall survival

Supplementary Table S2A: Details of estimates of cox-regression model in the entire population stratified by N-stage

Supplementary Table S2B: Details of estimates of cox-regression model in the population with no/few comorbidities and stratified by N-stage

Supplementary Table S2C: Details of estimates of cox-regression model in the population stratified by N-stage and age. (age>50)

Supplementary Table S2D: Details of estimates of cox-regression model in the population stratified by N-stage and age(age>50)
