

SUPPLEMENTARY FIGURE AND TABLE

Supplementary Figure S1: Fold change in HOXB7 gene expression in tumours after treatment with RA, THAL, or the combination, RA + THAL. No significant change in expression was observed (mean values and std. errors; $n = 3$).

Supplementary Table S1: Gene Set Enrichment analysis of pathways differentially regulated in U251 xenografts treated with RA and THAL as sole agents, or in combination, RA+THAL, relative to untreated controls. SIZE: number of genes in the pathway; ES: enrichment score; NES: normalized enrichment score; NOM p -val: nominal p -value; FDR p -val: false discovery rate p -value.
