3C, Three-City Study; AIC, Akaike information criterion; Buschke, Buschke selective reminding test; CI, confidence interval, NAS, normative aging study; PEs, practice effects; WHICAP, Washington Heights-Inwood Community Aging Project.

a. Depression coefficients are for depressive patients.

b. Time coefficients are for one year of aging.

Web Table 5. Effects of Different Practice Effects Specifications on Cognitive Change for Diabetes by Study, Balanced Data From 3C-Dijon (Dijon, France, 1999–2010), NAS (Greater Boston Area, MA, 1993–2007) and WHICAP (New York City, NY, 1999–2012) Using Time Elapsed (Years) Since Baseline as the Time Scale With Main Exposure by Time Interaction and Exposure by Practice Effects Interaction
