LADA, patients with latent autoimmune diabetes in adults; N/A, not appropriate; NGT, normal glucose tolerance subjects; T1D, type 1 diabetic subjects; T2D, type 2 diabetic subjects.

SUPPLEMENTARY DATA

Supplementary Figure 1. The frequency of CD19⁺ B lymphocytes in subtypes of diabetes and controls. Each point represents the frequency of CD19⁺ B lymphocytes of an individual. Horizontal lines show medians. NGT, normal glucose tolerance subjects; LADA, latent autoimmune diabetes in adults subjects; T1D, type 1 diabetic subjects; T2D, type 2 diabetic subjects.

SUPPLEMENTARY DATA

Supplementary Figure 2. The frequency of B cell subsets in age and gender matched subjects. The frequency of MZB (A), FoB (B), T2-MZP B (C), B10 (D) cells gated on CD19⁺ B cells. *P* values refer to comparison of data after adjustment for BMI. Each point represents the percentage of B cell subsets of an individual. Horizontal lines show medians. * *P* < 0.05, ** *P* < 0.01, *** *P* < 0.001. NGT, normal glucose tolerance subjects; LADA, latent autoimmune diabetes in adults subjects; T1D, type 1 diabetic subjects; T2D, type 2 diabetic subjects.
