Title: Compliance to practice guidelines of intermittent hemodialysis in intensive care units.

Description of data: Compliance to practice guidelines of intermittent hemodialysis in intensive care units according to reference [1]. Data are number of sessions (percentage of the total number of sessions studied).

Dialysis settings	n (%)
Isovolemic connection with 0.9% saline	107 (100%)
Dialysate sodium concentration ≥ 145 mmol/L	75 (70%)
Minimal IHD session duration 4H	92 (86%) *
Dialysate temperature $\leq 37^{\circ}\text{C}$	106 (99%)

* IHD sessions of less than 4H00 duration were initially planned for at least a 4H00 duration, but were prematurely interrupted for medical, technical or organizational reasons.

IHD = intermittent hemodialysis.
