

Posterior or Panuveitis subtype	Total Eyes	Number with retinal NV	Person Years	Incidence rate % per eye-year (95%CI)
Vogt-Koyanagi-Harada Syndrome	179	6	602.18	1.0 (0.37 – 2.2)
Sympathetic Ophthalmia	58	0	296.08	0.0 (0.0 – 1.0)
Primary or Secondary Panuveitis	867	18	3225.61	0.56 (0.33 - 0.88)
Retinochoroiditis	91	0	244.06	0.0 (0.0 – 1.2)
Multifocal Choroiditis with Panuveitis	254	3	1116.56	0.27 (0.06 - 0.79)
Other Posterior Uveitis	194	2	625.67	0.32 (0.04 – 1.2)
Birdshot Retinochorioretinopathy	233	1	1011.39	0.10 (0.0 - 0.55)
Retinal Vasculitis	396	23	1151.44	2.0 (1.3 – 3.0)

**Table 6**

Incidence of retinal retinal neovascularization by posterior or panuveitis subtype. The incidence of retinal neovascularization was highest with retinal vasculitis (2.0% per eye-year) followed by Vogt-Koyanagi-Harada syndrome (1.0% per eye-year).
