

Supplementary Figure 1. Body weight and diet consumption of CONV-R and GF mice fed lard or fish oil for 11 weeks. (A) Body weight after 11 weeks of high-fat diet. (B) Food consumption averaged during the first 6 weeks of high-fat diet (n=2-6 cages). Mean values \pm SEM are plotted. Variation induced by the diet: $^{\dagger\dagger\dagger}p < 0.001$.
