

Supplementary Figure 2. Expression of hepatic genes encoding macrophage markers in CONV-R and GF mice fed lard or fish oil for 11 weeks. Expression of (A) *CD68*, (B) *Emr1* (encoding F4/80) and (C) *Clec4f* (n=6 mice per group). Mean values \pm SEM are plotted. Variation induced by the diet: †p < 0.05, Variation induced by the gut microbiota: \$\$\$p < 0.001.
