**Supplementary information:**

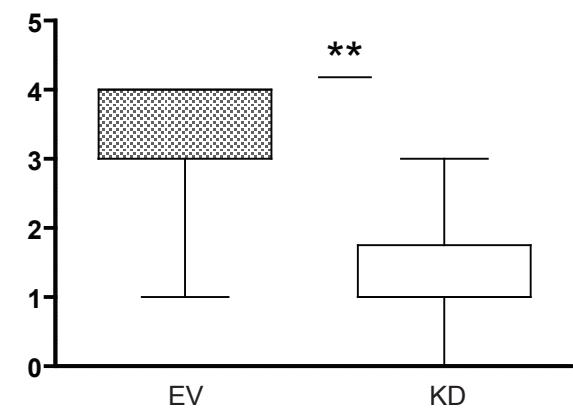

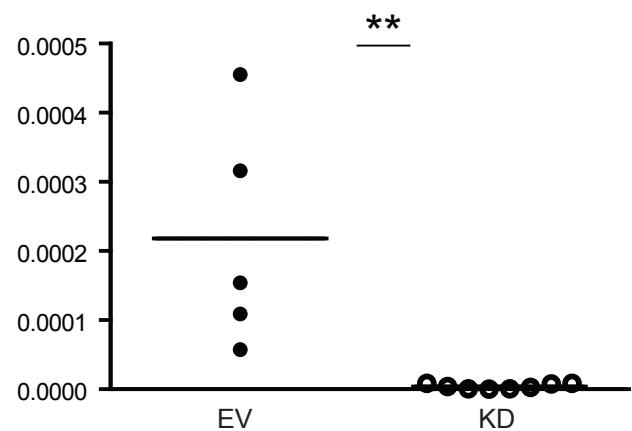

**Supplementary figure 1: MMP2 expression in tumors**

MMP2 mRNA expression determined by qPCR (mean +/- SD) and MMP2 score (median with 5 and 95 percentile of atleast 5 samples) determined by immunohistochemistry in HT1080, U373 and U87 control (EV) and MMP2-KD (KD) tumors (\*\*P< 0.0001, \*\* P< 0.01, \*P <0.05).

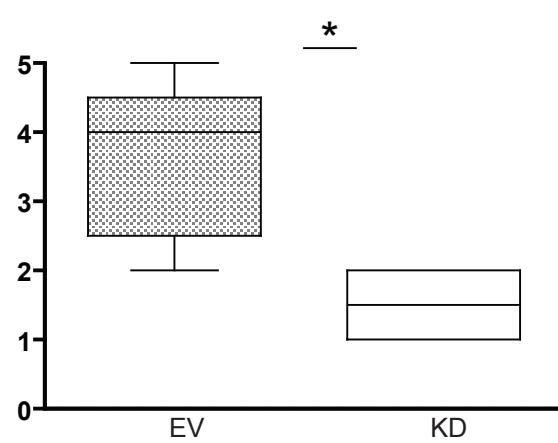

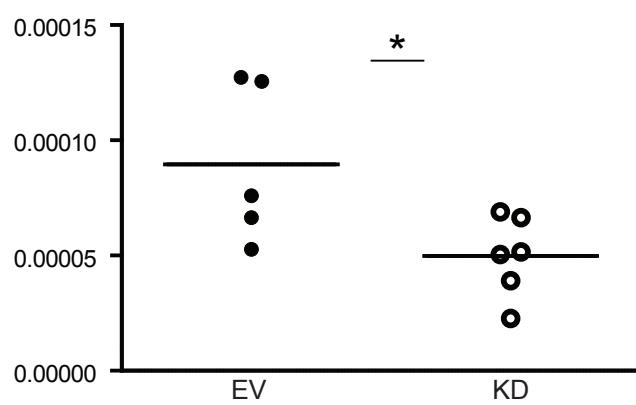

### mRNA expression

### MMP2 score

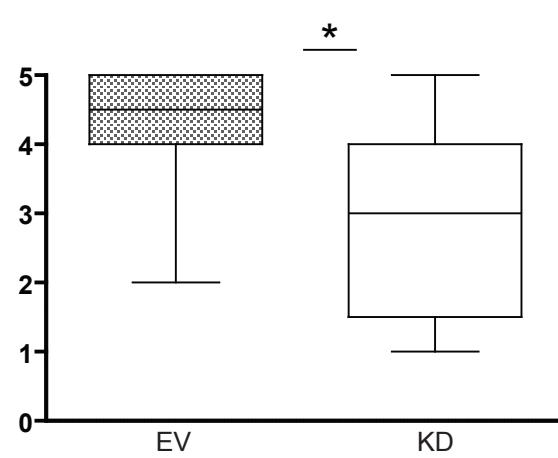

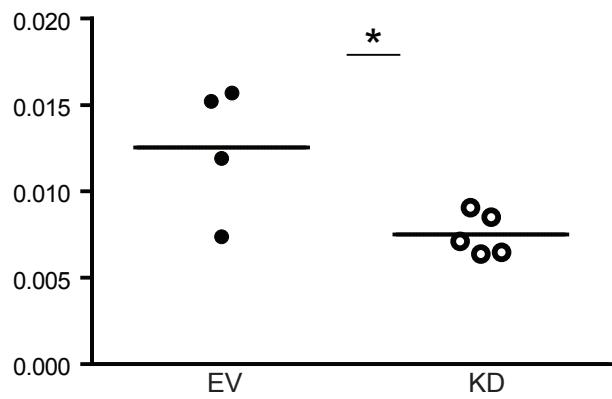

**HT1080**

**U373**

**U87**

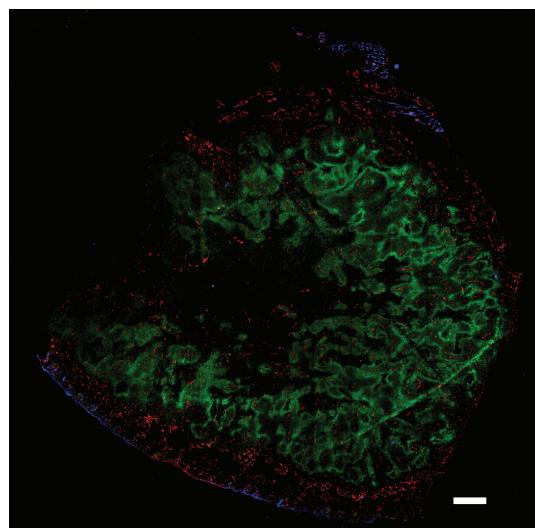

**Supplementary figure 2:** Representative images for tumor microenvironment

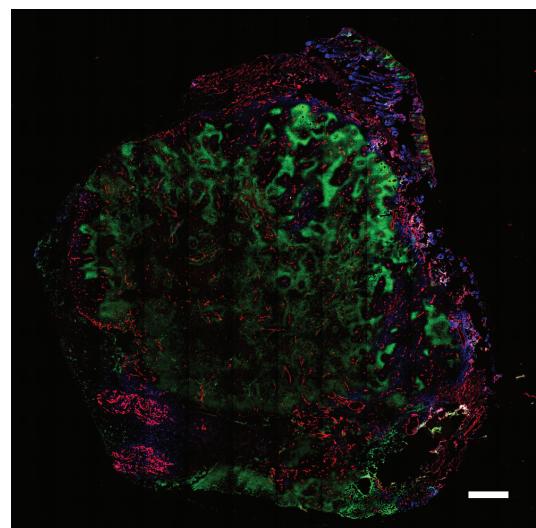

Immunohistochemistry images of HT1080, U373 and U87 control (EV) and MMP2-KD (KD) tumors stained for Hypoxia [pimonidazole (pimo)] in green, blood vessels (CD31) in red and perfused vessels (Hoechst) in blue. White bar represents a scale of 1mm.

Pimo  
CD31  
Hoechst

EV

HT1080

U373

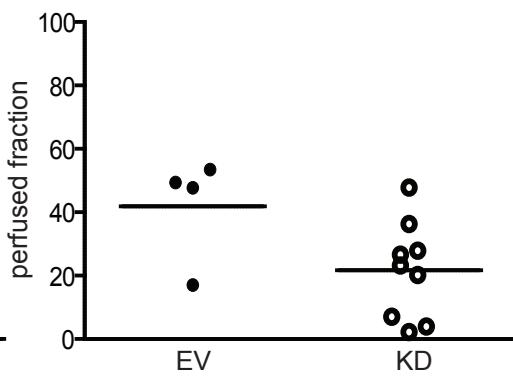

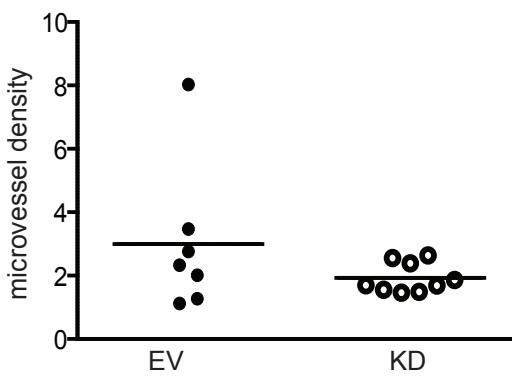

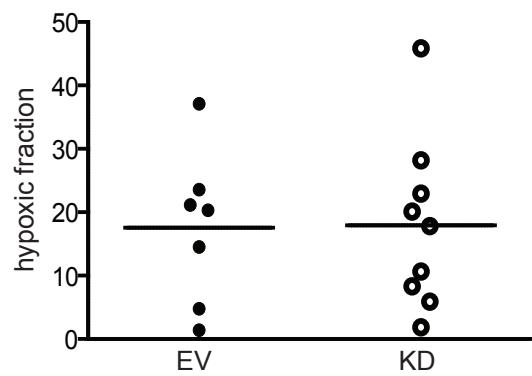

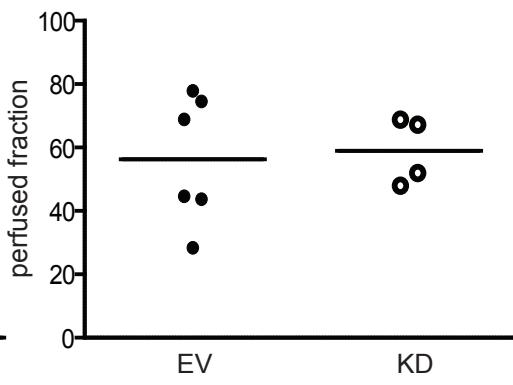

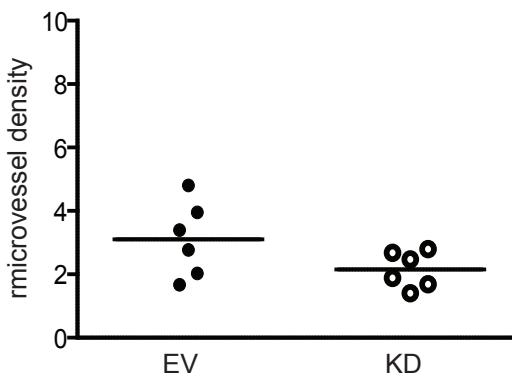

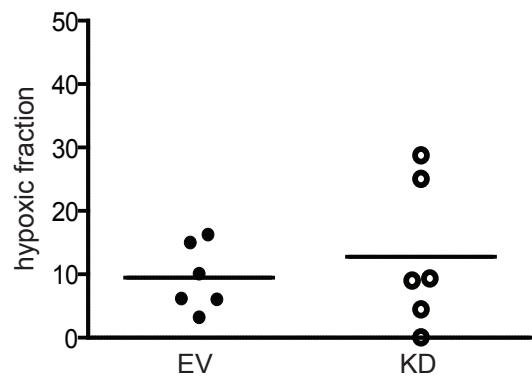

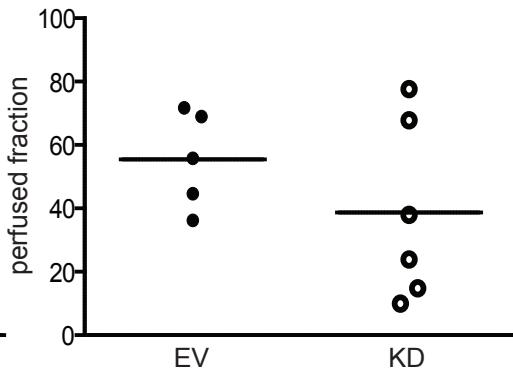

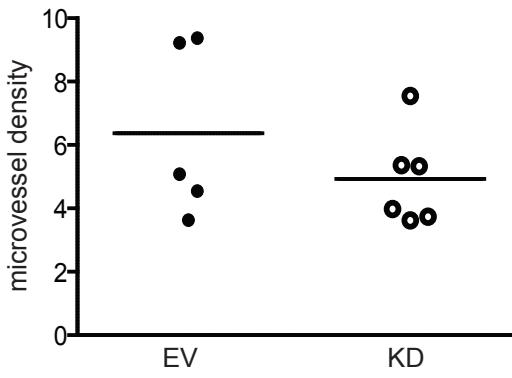

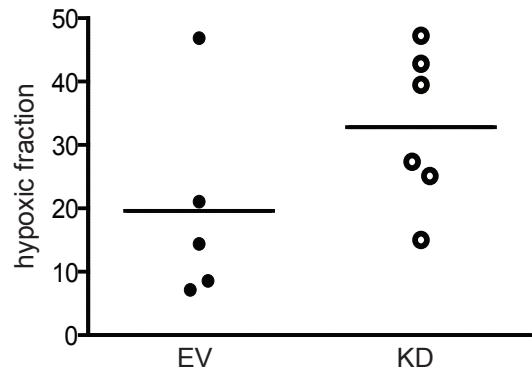

U87

**Supplementary figure 3: Tumor microenvironmental characteristics and MMP14 expression**

(a) Quantification of the hypoxic fraction, microvessel density and the percent perfused vessels in HT1080 U373 and U87 control (EV) and MMP2-KD (KD) tumors. (b) Western blot analysis and (c) quantification of active MMP14 expression in tumor lysates. Data represents mean +/- SD of at least 5 samples.
