

S1 Figure. Analysis of *rpoC1*, *rpoC2*, and *rbcL* cDNAs. a: Electrophoresis of results of cDNA amplification showing transcription and/or splicing of plastid genes (lanes 1-3 – *rpoC1*, fruits; 4-6 – *rpoC1*, perianth; 7-11 – *rpoC2*; 12-17 – *rbcL*). b: Chromatogram showing polymorphism in *rbcL* cDNA and DNA (T/C, marked by asterisks).
