

Appendix Table 1: Tocolytic trials included in the study

| Lead Author Name | Year | Total Number of Subjects | Comparison | Adequate sequence generation | Allocation concealment | Subject or personnel blinding | Outcome assessor blinding | Incomplete outcome data addressed | Free of selective reporting | Free of other bias | Quality Score | Final Quality Assessment |
|----------------------------------|------|--------------------------|--|------------------------------|------------------------|-------------------------------|---------------------------|-----------------------------------|-----------------------------|--------------------|---------------|--------------------------|
| Adam | 1966 | 51 | Placebo v Isoxuprine | 0 | 0 | + | + | + | + | + | 5 | 0 |
| Al-Omari | 2006 | 63 | Nifedipine v Atosiban | - | - | - | 0 | + | + | + | 3 | 0 |
| Al-Qattan | 2000 | 60 | Nifedipine v Ritodrine | + | 0 | 0 | 0 | + | + | + | 4 | 1 |
| Amorim | 2009 | 50 | Notroglycerine v Nifedipine | + | + | - | + | 0 | + | + | 5 | 1 |
| Aramayo | 1990 | 29 | Magnesium Sulfate v Terbutaline | 0 | 0 | 0 | 0 | + | + | + | 3 | 0 |
| Beall | 1985 | 131 | Magnesium Sulfate v Ritodrine v Terbutaline | + | + | - | 0 | + | + | + | 5 | 1 |
| Besinger | 1991 | 40 | Indomethacin v Ritodrine | + | + | 0 | 0 | + | + | + | 5 | 1 |
| Bisits | 2004 | 238 | Glyceryl trinitrate v Betamimetic (either salbutamol or ritodrine) | + | + | 0 | 0 | + | - | + | 4 | 1 |
| Borna | 2007 | 104 | Celecoxib v Magnesium Sulfate | + | + | + | + | + | + | + | 7 | 1 |
| Canadian PTL Investigators Group | 1992 | 708 | Ritodrine v Dextrose solution | + | + | + | + | + | + | + | 7 | 1 |
| Cararach | 2006 | 80 | Ritodrine v Nifedipine | 0 | + | - | 0 | + | - | + | 3 | 0 |
| Caritis | 1984 | 100 | Terbutaline v Ritodrine | + | + | + | + | + | + | + | 7 | 1 |
| Csapo | 1977 | 36 | Placebo v Isoxsuprine | 0 | 0 | + | + | + | + | + | 5 | 0 |
| Chau | 1992 | 98 | Magnesium Sulfate v Terbutaline | - | - | 0 | 0 | + | + | + | 3 | 0 |
| Cotton | 1984 | 54 | Magnesium Sulfate v Terbutaline v Dextrose | 0 | 0 | 0 | 0 | - | + | + | 2 | 0 |
| Cox | 1990 | 156 | Magnesium Sulfate v Placebo | + | + | 0 | 0 | + | + | + | 5 | 1 |
| El-Sayed | 1999 | 31 | Magnesium Sulfate v | + | + | 0 | 0 | + | + | + | 5 | 1 |

| | | | | | | | | | | | | | |
|--|------|-----|--------------------------------|---|---|---|---|---|---|---|---|---|--|

For risk of bias assessments: + = adequate for that category, 0 = unclear, - = inadequate for that category. The Quality score is the number of + out of 7 for that trial. The overall Quality Assessment is given a 1=adequate overall quality or 0= inadequate overall quality if at least 4 of the domains are adequate with at least 1 being in the Sequence generation or Allocation concealment categories.
