

ESM Fig. 6: FOXP1 and FOXP4 are deleted from remaining Glucagon⁺ cells in *Foxp1/2/4* cKO mice. Pancreata from 4W control and *Foxp1/2/4* cKO mice were monitored by immunofluorescence for Glucagon (GCG), and FOXP1 (a.) or FOXP4 (b.) White arrow head: FOXP⁺/Glucagon⁺ cells; Yellow arrowhead: FOXP⁻/Glucagon⁺ cells. Scale bars = 20µm.
