

Supplemental Table S1

Available samples by late GVHD syndrome. Samples include cryopreserved peripheral blood mononuclear cells, heparin plasma, EDTA plasma, serum, and urine

Table 6. Currently available samples*	Patients	Late acute GVHD	Chronic GVHD	Cutaneous sclerosis	Bronchiolitis obliterans syndrome (BOS)	No late GVHD syndrome
d100 post HCT	875	80	341	41	16	488
d180 post HCT	422	18	139	12	6	268
d365 post HCT	83	1	9	1	1	74
Late GVHD syndrome onset	283	59	236	17	7	--
3mo post onset	248	42	208	13	11	--
6mo post onset	158	27	134	9	7	--
* sample categories not mutually exclusive across columns. For example, a chronic GVHD onset sample may be concurrent with a cutaneous sclerosis onset sample						
Abbreviations: HCT: hematopoietic cell transplant; GVHD: graft-versus-host disease
