Appendix to Table 3

Choice specified as:	1993 & 1996			1974, 1977, 1983*		
	Year 1	Year 3	Year 5	Year 1	Year 3	Year 5
	n/N	n/N	n/N	n/N	n/N	n/N
Definite	722/982	1324/1532	2082/2263	1369/1844	2536/2924	2108/2318
Probable	935/1743	1016/1457	752/1015	1621/3106	1462/2144	717/995
Uncertain	213/742	140/407	76/184	303/1277	215/632	85/243
Total	1890/3508	2494/3579	2916/3524	3310/6264	4233/5752	2976/3646

*Year 5 data excludes the 1983 cohort.

In the body of the table, 'N' denotes the numbers of respondents working in a known medical destination at year 10 and responding to the definiteness of choice question, and 'n' denotes the numbers of these who gave a matching untied first choice in years 1, 3, and 5.

The 'Total' line includes all responders with known choice and year 10 destination, including those who did not respond to the definiteness of choice question; hence totals are greater than the total of definite, probable and uncertain. Of those working in a medical destination at year 10, 78 gave no response to the definiteness of choice question at year 1, 235 at year 3 and 163 at year 5.
