

**Table S11** Differentially expressed genes between *E. coli*  $\Delta aceA_1 \Delta pgi_2$  and *E. coli*  $\Delta pgi_1 \Delta aceA_2$  mutants with q-values < 0.05

| Name        | <i>E. coli</i> $\Delta aceA_1 \Delta pgi_2$ | <i>E. coli</i> $\Delta pgi_1 \Delta aceA_2$ | Product  |
|-------------|---|---|--|
| <i>arpA</i> | 53  | 1   | ankyrin repeat protein   |
| <i>yjbB</i> | 75  | 2   | putative Na <sup>+</sup> /Pi-cotransporter                                 |
| <i>rluF</i> | 75  | 1   | 23S rRNA pseudouridine(2604) synthase                                      |
| <i>iclR</i> | 74  | 3   | transcriptional repressor  |
| <i>pepE</i> | 59  | 2   | (alpha)-aspartyl dipeptidase   |
| -           | 264   | 5   | antisense: lysC  |
| <i>yjbD</i> | 79  | 1   | DUF3811 family protein   |
| <i>lysC</i> | 243   | 4   | lysine-sensitive aspartokinase 3   |
| <i>metH</i> | 94  | 3   | homocysteine-N5-methyltetrahydrofolate transmethylase, B12-dependent       |
| <i>aceK</i> | 85  | 2   | isocitrate dehydrogenase kinase/phosphatase                                |
| <i>pgi</i>  | 1   | 7   | glucosephosphate isomerase   |
| -           | 213   | 1570  | -  |
| <i>ynbG</i> | 30  | 14  | uncharacterized protein  |
| <i>aceA</i> | 2   | 15  | isocitrate lyase   |
| <i>rseX</i> | 35  | 12  | -  |
| <i>ydcD</i> | 39  | 11  | uncharacterized protein  |
| <i>yhhH</i> | 52  | 15  | putative immunity protein for putative polymorphic toxin RhsB              |
| <i>yagF</i> | 40  | 12  | CP4-6 prophage; dehydratase family protein                                 |
| <i>yjcF</i> | 34  | 11  | pentapeptide repeats protein   |
| <i>ybfC</i> | 67  | 23  | putative periplasmic protein   |
| <i>sokA</i> | 50  | 23  | -  |
| <i>yagM</i> | 43  | 15  | CP4-6 prophage; uncharacterized protein                                    |
| <i>yibG</i> | 49  | 16  | TPR-like repeat protein  |
| <i>ymfE</i> | 43  | 15  | e14 prophage; putative inner membrane protein                              |
| <i>yibA</i> | 44  | 16  | HEAT-domain lethality reduction protein; putative immunity protein for ... |
| <i>rpiB</i> | 79  | 29  | ribose 5-phosphate isomerase B/allose 6-phosphate isomerase                |
| <i>yncH</i> | 36  | 12  | IPR020099 family protein   |
| <i>yagH</i> | 38  | 13  | CP4-6 prophage; putative xylosidase/arabinosidase                          |
| <i>yagL</i> | 44  | 16  | CP4-6 prophage; DNA-binding protein  |
| <i>ybbC</i> | 66  | 24  | putative immunity protein  |
| <i>psaA</i> | 96  | 73  | -  |
| <i>yqeL</i> | 47  | 16  | uncharacterized protein  |
| <i>dapB</i> | 109   | 366   | dihydrodipicolinate reductase  |
| <i>yhhZ</i> | 45  | 16  | putative Hcp1 family polymorphic toxin protein; putative colicin-like ...  |
| <i>phnM</i> | 39  | 15  | ribophosphonate triphosphate hydrolase                                     |
| <i>phnG</i> | 37  | 14  | ribophosphonate triphosphate synthase subunit                              |
| <i>argF</i> | 141   | 52  | ornithine carbamoyltransferase 2, chain F; CP4-6 prophage                  |
| -           | 87  | 69  | antisense: cheY  |
| <i>ythA</i> | 64  | 26  | uncharacterized protein  |
| -           | 756   | 2377  | antisense: ryfD  |
| <i>ryfD</i> | 701   | 2239  | -  |
| <i>appY</i> | 46  | 19  | global transcriptional activator; DLP12 prophage                           |
| <i>rprA</i> | 57  | 26  | -  |
| <i>yagG</i> | 43  | 16  | CP4-6 prophage; putative sugar transporter                                 |
| <i>yjbS</i> | 51  | 21  | uncharacterized protein  |
| <i>phnN</i> | 38  | 15  | ribose 1,5-bisphosphokinase  |
| <i>tdcR</i> | 44  | 18  | L-threonine dehydratase operon activator protein                           |
| <i>ygeG</i> | 51  | 22  | SycD-like chaperone family TPR-repeat-containing protein                   |
| <i>phnH</i> | 30  | 12  | ribophosphonate triphosphate synthase subunit                              |
| <i>ybfK</i> | 37  | 15  | uncharacterized protein  |
| <i>ymfD</i> | 53  | 23  | e14 prophage; putative SAM-dependent methyltransferase                     |
