

Results of service utilisation

Available case resource use*

Resource Use	Mean		Difference in mean (95% CI)
	WISE	Control	
Length of stay	1.589	1.322	0.268 (-0.343 to 0.879)
Outpatient attendances	2.912	2.887	0.024 (-0.366 to 0.415)
A&E attendances	.298	.290	0.009 (-0.050 to 0.068)
GP surgery visits	4.429	4.505	-0.077 (-0.371 to 0.218)
GP home visits	0.155	0.227	-0.072 (-0.009 to -0.135)
GP Other	0.208	0.280	-0.072 (-0.157 to 0.012)
Practice Nurse visits	2.783	2.893	-0.110 (-0.307 to 0.086)
Community Nurse visits	1.141	0.615	0.525 (0.129 to 0.922)
OT Visits	0.136	0.081	0.055 (-0.057 to 0.166)
Home care worker	1.156	2.290	-1.133 (-4.405 to 2.139)
Meals on wheels	0.028	0.181	-0.153 (-0.402 to 0.095)
Physiotherapist	0.104	0.090	0.014 (-0.041 to 0.070)
NHS Direct	0.172	0.136	0.036 (-0.030 to 0.101)
Walk in Centre	0.534	0.357	0.178 (0.034 to 0.321)
Respite care	0.077	0.039	0.038 (-0.031 to 0.107)
Counsellor	0.252	0.281	-0.029 (-0.156 to 0.098)
Other	0.865	0.528	0.337 (0.045 to 0.630)

*Available cases are those that provided data for that variable at each follow-up, for example if GP visits at 6 months and 12 months were both recorded, then total GP visits over duration of trial has been calculated for that individual. Missing data were about 32%. These were very similar to other variables. At 6 months there were 4470 response (79.8%) to GP question, at 12 months figures were 4075 (72.8%)
