cell part
cell
intracellular
intracellular part
intracellular organelle
organelle
membrane
binding
catalytic activity
cation binding
ion binding
metal ion binding
transferase activity
nucleic acid binding
transition metal ion binding
hydrolase activity
protein binding
nucleotide binding
DNA binding
metabolic process
cellular process
primary metabolic process
cellular metabolic process
macromolecule metabolic process
cellular macromolecule metabolic process
cellular biosynthetic process
biosynthetic process
biological regulation
nitrogen compound metabolic process
cellular macromolecule biosynthetic process
macromolecule biosynthetic process
gene expression
protein metabolic process
nucleobase, nucleoside, nucleotide and nucleic acid metabolic process
cellular protein metabolic process
regulation of biological process
regulation of metabolic process
transcription
regulation of primary metabolic process
regulation of cellular process
regulation of macromolecule metabolic process
response to stimulus
regulation of cellular metabolic process
regulation of macromolecule biosynthetic process
regulation of cellular biosynthetic process
regulation of transcription
regulation of gene expression
nucleobase, nucleoside, nucleotide and nucleic acid metabolic process
regulation of nitrogen compound metabolic process
Biological process
Cellular components
Molecular functions
