* For all test sessions, chimpanzees in the HR group showed a preference for grapes: session 1 (two-tailed Mann–Whitney U test: $U = 2.51, N_1 = 5, N_2 = 5, P = 0.01$); session 2 ($U = 2.51, N_1 = 5, N_2 = 5, P = 0.01$); session 3 ($U = 2.51, N_1 = 5, N_2 = 5, P = 0.01$).

† For all test sessions, chimpanzees in the MR group showed a preference for grapes: session 1 (two-tailed Mann–Whitney U test: $U = 3.07, N_1 = 7, N_2 = 7, P = 0.01$); session 2 ($U = 3.07, N_1 = 7, N_2 = 7, P = 0.01$); session 3 ($U = 3.07, N_1 = 7, N_2 = 7, P = 0.01$).
