

S1 Fig.

A) all OAG, IOP % reduction at 1 year

B) POAG, IOP % reduction at 1 year

S1 Fig. IOP reduction at 1 year as percentage of preoperative IOP. A) In all open angle glaucoma patients, a higher glaucoma index group assignment indicating more severe glaucoma was found to be associated with a larger IOP reduction (percentage +/- 95% confidence interval). B) Primary open angle glaucoma had highly similar IOP percentage reduction at 1 year (percentage +/- 95% confidence interval).
