

SUPPLEMENTARY FIGURES

Supplementary Figure S1: A–B. Immunofluorescence of E-cadherin and N-cadherin in SW480 and HCT116 cells after hTERT overexpression. C. qRT-PCR of Slug, Snail and Twist in SW480 and HCT116 cells after hTERT overexpression.

Supplementary Figure S2: A–B. Immunofluorescence of E-cadherin in SW480 and HCT116 cells after hTERT overexpression and Wnt inhibition (XAV).

Supplementary Figure S3: **A.** Immunofluorescence of E-cadherin in HCT116 cells after hTERT overexpression and ZEB1 knock down. **B.** Cell morphological changes after hTERT overexpression and ZEB1 knock down in HCT116 cells. **C.** ZEB1 expression was analyzed by western blot after hTERT overexpression in SW480 and HCT116 cells.
