<i>fliW</i> _GC.BamHI_RV1	<i>fliW</i> genetic complementation	CTGCCTAGGGATCCATTGCAAGTAT ATAGAGC
pSV009_GCamplif_FW1	genetic complementation region	TAATAGAAATTCCCCAAGTCCC
pSV009_GCamplif_RV1	genetic complementation region	CTATTGCCATAGTAGCTCTTAGTGG
pSV009_seq_FW1	sequencing complemented gene	GGAGACATTCTCCGTATCT
pSV009_seq_RV1	sequencing complemented gene	AGCGAGACAAAAACACTGAGC

<sup>a</sup> Abbreviations for antibiotics: Cm<sup>r</sup>, chloramphenicol resistance. <sup>b</sup> restriction sites are underlined.

**Table S2** Overview of variants identified in CJM1cam compared to the M1 reference genome

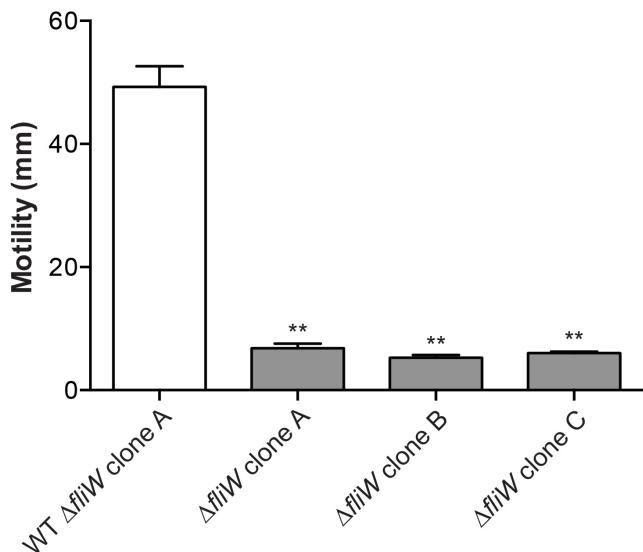

Position <sup>a</sup>	Gene or intergenic	Gene	Description ( <i>C. jejuni</i> M1 annotation)	Reference	Variant	Variant type	Feature Type	Variant effect	Predicted effect (protein level) <sup>b</sup>	Method of identification
60704	CJM1_0043	-	putative drug resistance transporter	A	C	SNP	transcript	stop lost, splice region	Ter351Gly; termination codon at position 351 changed to a glycine with the extension not containing a new stop codon	Illumina sequencing
130527	CJM1_0121	-	conserved hypothetical protein	T	G	SNP	coding	mis-sense	Cys418Gly	Illumina sequencing
243119	CJM1_0246	<i>zupT</i>	ZIP Zinc transporter family protein	-	A	Insertion	coding	frameshift	Asn144fs	Illumina sequencing
254704	CJM1_0259	<i>clpX</i>	ATP-dependent Clp protease, ATP-binding subunit ClpX	-	A	Insertion	coding	frameshift	Ile406fs	Illumina sequencing
328734	CJM1_0339	<i>lspA</i>	signal peptidase II	-	T	Insertion	coding	frameshift	Gly117fs	Illumina sequencing
345149	CJM1_0355	-	ATPase associated with various cellular activities family protein	-	A	Insertion	coding	frameshift	Val436fs	Illumina sequencing
538730	CJM1_0561	-	DNA polymerase III, delta subunit	T	-	Deletion	coding	frameshift	Leu172fs	Illumina sequencing
566518	CJM1_0588,	<i>algI/-</i>	Alginate O-acetyltransferase AlgI/hypothetical protein	A	-	Deletion	coding	frameshift, frameshift	Leu5fs/Ala206fs	Illumina sequencing
620355	CJM1_0644	-	potassium-translocating ATPase A subunit	-	T	Insertion	coding	frameshift	Tyr249fs	Illumina sequencing
624999	CJM1_0648	<i>kdpD</i>	universal stress family protein	-	A	Insertion	coding	frameshift	Ser345fs	Illumina sequencing
635642	CJM1_0659	-	conserved hypothetical protein	C	-	Deletion	coding	frameshift	Gly134fs	Illumina sequencing
648786	CJM1_0674	-	conserved hypothetical protein	T	-	Deletion	coding	frameshift	Asn194fs	Illumina sequencing
684129	CJM1_0713	-	putative membrane protein	C	G	SNP	coding	mis-sense	Pro24Ala	Illumina sequencing
752411	CJM1_0777	-	mviN-like family protein	-	A	Insertion	coding	frameshift	Glu77fs	Illumina sequencing
790633	CJM1_0815	-	putative soluble lytic murein transglycosylase	A	G	SNP	coding	mis-sense	Ile291Thr	Illumina sequencing
813743	CJM1_0839	<i>astA</i>	arylsulfotransferase family protein	A	-	Deletion	coding	frameshift	Arg427fs	Illumina sequencing
813749	CJM1_0839	<i>astA</i>	arylsulfotransferase family protein	T	G	SNP	coding	mis-sense	Leu428Val	Illumina sequencing
817253	CJM1_0845,	-,-	hypothetical protein, hypothetical protein	A	C	SNP	intergenic	-	-	Illumina sequencing
817253	CJM1_0846	-	hypothetical protein, hypothetical protein	-	T	Insertion	coding	-	-	Illumina sequencing
861927	CJM1_0891	<i>apt</i>	adenine phosphoribosyltransferase	C	T	SNP	coding	mis-sense	Leu46Phe	Illumina sequencing
878548	CJM1_0907	-	putative cju26	A	G	SNP	coding	mis-sense	Leu5Pro	Illumina sequencing
921927	CJM1_0954	-	M42 glutamyl aminopeptidase family protein	-	A	Insertion	coding	frameshift	Arg170fs	Illumina sequencing
939896	CJM1_0974	<i>rpoD</i>	RNA polymerase sigma factor RpoD	A	T	SNP	coding	mis-sense	Asp106Val	Illumina sequencing
961924	CJM1_0995	-	putative porin domain protein	-	T	Insertion	coding	frameshift	Asn44fs	Illumina sequencing
965941	CJM1_1000,	-, <i>gyrA</i>	Putative lipoprotein, DNA gyrase subunit A	-	T	Insertion	coding	-	-	Illumina sequencing
972139	CJM1_1005	<i>cmeD</i>	outer membrane efflux family protein	A	G	SNP	coding	synonymous	Leu93Leu	Illumina sequencing
1002619	CJM1_1032,	-, <i>murC</i>	integral membrane protein, UDP-N-acetylmuramate-L-alanine ligase	-	A	Insertion	Intergenic	-	-	Illumina sequencing
1103635	CJM1_1139	-	rho termination factor, N-terminal domain protein	-	A	Insertion	coding	frameshift	Ala63fs	Illumina sequencing
1130876	CJM1_1170	<i>mnmG</i>	putative tRNA uridine 5-carboxymethylaminomethyl modification enzyme MnmG	A	G	SNP	coding	mis-sense	Val438Ala	Illumina sequencing
1252081	CJM1_1289	<i>pseA</i>	putative flagellin modification protein, PseA	-	A	Insertion	coding	frameshift	Ter330fs	Illumina sequencing
1252105	CJM1_1289	<i>pseA</i>	putative flagellin modification protein, PseA	-	G	Insertion	coding	frameshift	Leu322fs	Illumina sequencing
1261071	CJM1_1295	-	flagellin B domain protein	-	T	Insertion	coding	frameshift, splice region	-	Sanger DNA sequencing
1261073	CJM1_1295	-	flagellin B domain protein	-	T	Insertion	coding	frameshift	Ter222fs	Sanger DNA sequencing
1261080	CJM1_1295	-	flagellin B domain protein	-	T	Insertion	coding	frameshift	Arg220fs	Sanger DNA sequencing
1271162	CJM1_1304,	<i>cdsA/cdsA</i>	putative phosphatidate cytidylyltransferase/cytidylyltransferase family protein	-	C	Insertion	coding	frameshift, frameshift	Met9fs/Val117fs	Illumina sequencing
1300762	CJM1_1333,	-,-	Iron-sulfur cluster-binding domain protein/membrane protein	T	G	SNP	coding	mis-sense, synonymous	Leu11Arg/Thr118Thr	Illumina sequencing
1300765	CJM1_1333,	-,-	Iron-sulfur cluster-binding domain protein/membrane protein	T	-	Deletion	coding	frameshift, frameshift	Phe120fs/Leu13fs	Illumina sequencing
1341270	CJM1_1376	-	putative nucleotidyl-sugar dehydratase	-	T	Insertion	coding	frameshift	Phe290fs	Illumina sequencing
1514519	CJM1_1546,	-, <i>pgpA</i>	sulfate adenylyltransferase, putative, phosphatidylglycerophosphatase A	-	T	Insertion	intergenic	-	-	Illumina sequencing
1544219	CJM1_1585	-	PDZ domain family protein	A	G	SNP	coding	mis-sense	Arg136Gly	Illumina sequencing
1577749	CJM1_1627,	-, <i>bioB</i>	Putative biotin synthase	T	-	Deletion	coding	frameshift, frameshift	Lys2fs/Asn238fs	Illumina sequencing
1613795	CJM1_1679	<i>flgE-2</i>	putative flagellar hook protein FlgE	T	A	SNP	transcript	stop lost, splice region	Ter691Leu; termination codon at position 691 changed to a leucine with the extension not containing a new stop codon	Illumina sequencing

<sup>a</sup> position in *C. jejuni* M1 reference genome as published in Friis et al., 2010 PLoS one 5, e1225<sup>b</sup> Based on Human Genome Variation Society (HGVS) notation (<http://www.hgvs.org/mutnomen/>); fs = frame shift

**Table S3** Overview of variants identified in M1 wild-type *ΔflfW* (CJM1cam\_1052) and *ΔflfW* (CJM1cam\_1052) clone A

Position <sup>a</sup> region	Gene or intergenic region	Gene	Description ( <i>C. jejuni</i> CJM1cam annotation)	Reference	Variant	Variant type	Feature Type	Variant effect	Predicted effect (protein level) <sup>b</sup>	Note
<b><i>C. jejuni</i> M1 wild-type <i>ΔflfW</i> (CJM1cam_1052)</b>										
78447	CJM1cam_0061	<i>flfY_2</i>	Flagellar motor switch protein FlfY, partial	-	T	Insertion	coding	frameshift	Lys138fs	Unique to WT
87749	CJM1cam_0071, CJM1cam_0072	CJM1cam_0071, CJM1cam_0072	Glutathione synthase/Ribosomal protein S6 modification enzyme (glutaminyl transferase), non-heme iron protein, hemerythrin family	-	T	Insertion	intergenic	-	-	Also present in <i>flfW</i> mutant clone A
236030	CJM1cam_0238	CJM1cam_0238	Exonuclease III	-	T	Insertion	coding	frameshift	Lys45fs	Also present in <i>flfW</i> mutant clone A
275077	CJM1cam_0280	<i>modB</i>	ABC-type sulfate/molybdate transport system, permease component	A	T	SNP	coding	missense	Leu197His	Also present in <i>flfW</i> mutant clone A
279769	CJM1cam_0286	<i>bioA_1</i>	Adenosylmethionine-8-amino-7-oxononanoate aminotransferase	-	A	Insertion	coding	frameshift	Ile138fs	Also present in <i>flfW</i> mutant clone A

1459202	CJM1cam_1491	CJM1cam_1491	Putative ATPase	A	G	SNP	coding	missense	Lys8Glu	G variant also present in coupled WT

<sup>a</sup> position in *C. jejuni* CJM1cam reference genome (CP012149) submitted as part of this manuscript<sup>b</sup> Based on Human Genome Variation Society (HGVS) notation (<http://www.hgvs.org/mutnomen/>); fs = frame shift

**Fig. S1.** Motility of *C. jejuni* M1 *fliW* defined gene deletion mutants. Motility of three *fliW* (CJM1\_1052) deletion mutant clones ( $n = 4$ ) along with their coupled wild-type strain ( $n = 2$ ) was assayed on BHI plates with 0.4% (w/v) agar after overnight incubation. All three *fliW* (CJM1\_1052) mutant clones were non-motile. Differential motility of *fliW* mutant clones was tested against the coupled wild-type (WT) strain with a Mann-Whitney test. Data shown are the mean and SEM, with \*\*  $P < 0.01$ .
