

**Transcriptional profiling analysis of *Spodoptera litura* larvae challenged with
Vip3Aa toxin and possible involvement of trypsin in the toxin activation**

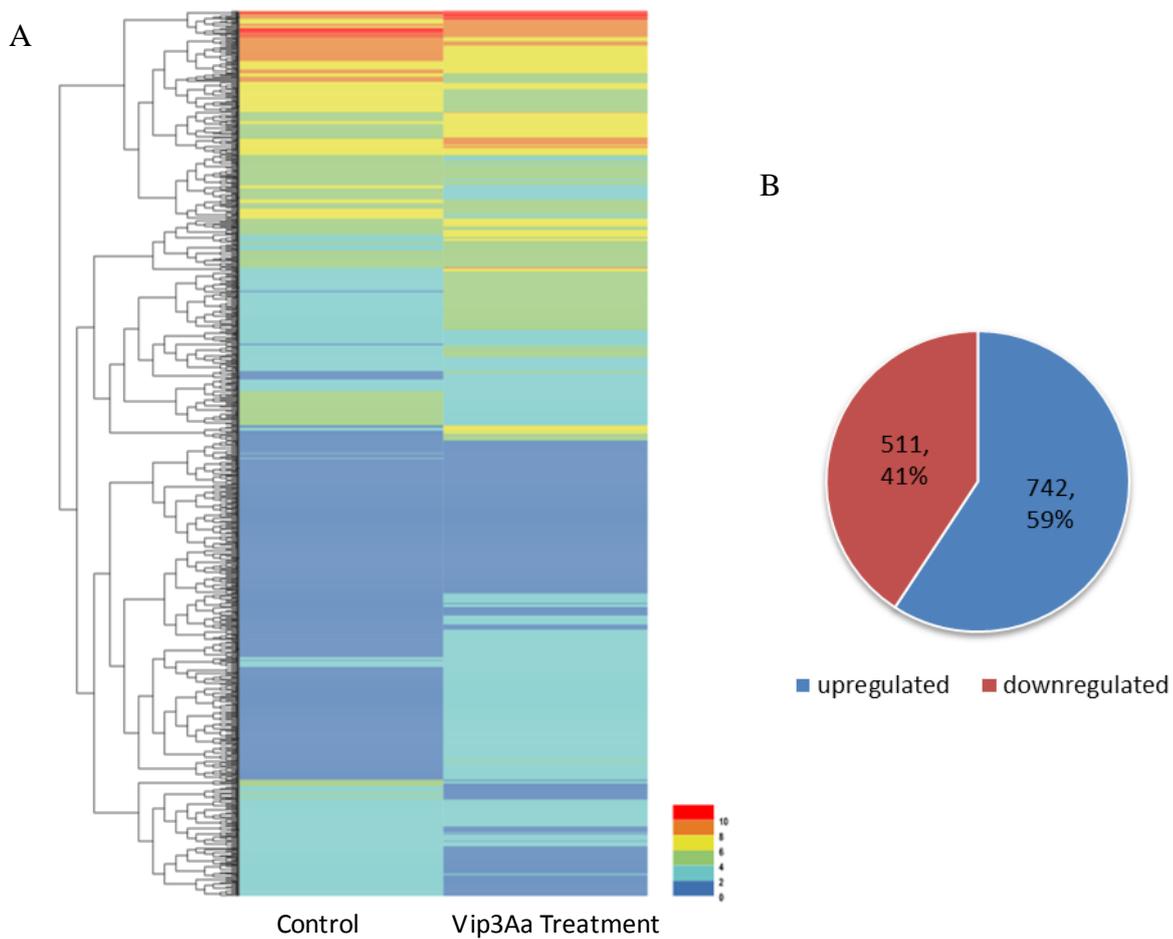

Figure S1. Differentially regulated genes of *S. litura* midgut during Vip3Aa intoxication. (A) Clustering analyses of DEGs after Vip3Aa intoxication. Each column represents a treatment, and each row represents a unigene. (B) Numbers of DGE unigenes of control and Vip3Aa-treated *S. litura*.

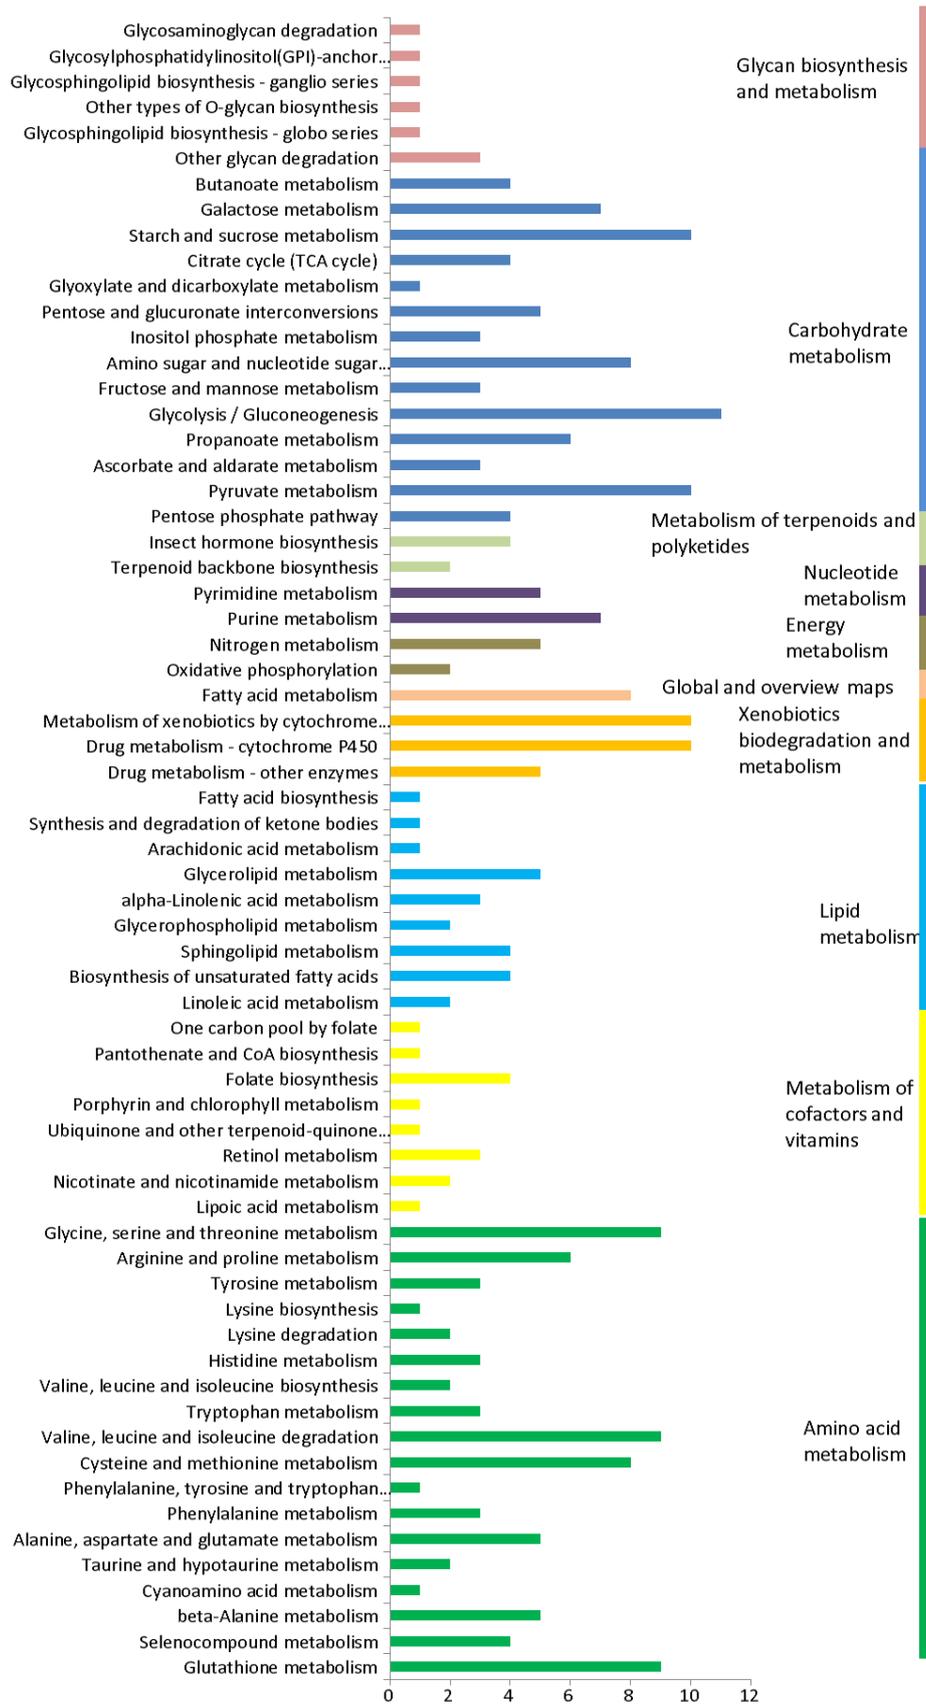

Figure S2 Summary of metabolism unigenes of *S. litura* larvae in response to the ingestion of Vip3Aa toxin.

Table S1 Immune-related unigenes of *S. litura* larvae in response to the ingestion of Vip3Aa toxin.

Function	Gene name	Unigene ID	nr_annotation	FDR	log2FC	regulated
