

Figure S1. Plot of between-class analysis for the samples of *C. minutus* by sampling site. Locality abbreviations correspond to those in Table 1.

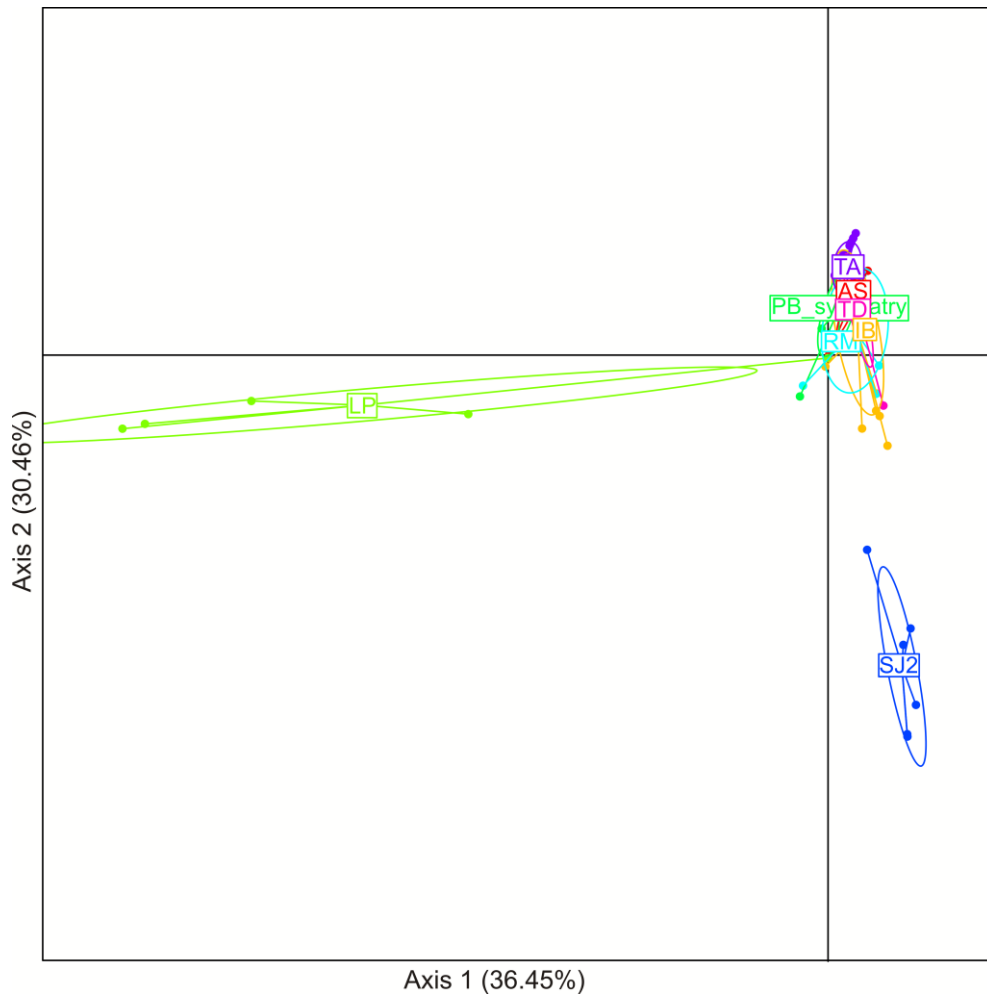

Figure S2. Plot of between-class analysis for the samples of *C. flamarioni* by sampling site. Locality abbreviations correspond to those in Table 1.

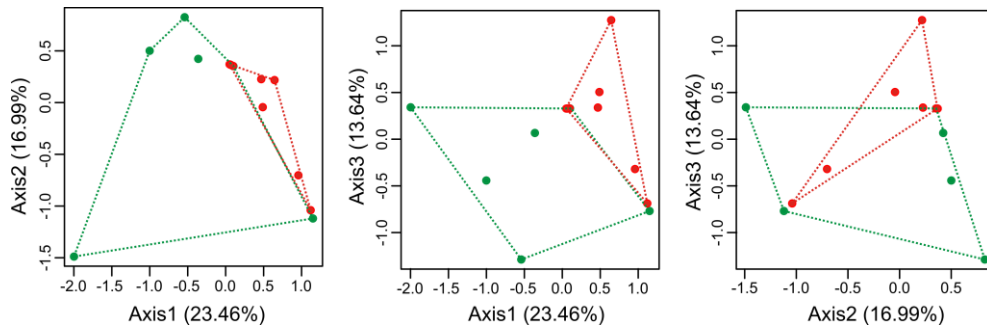

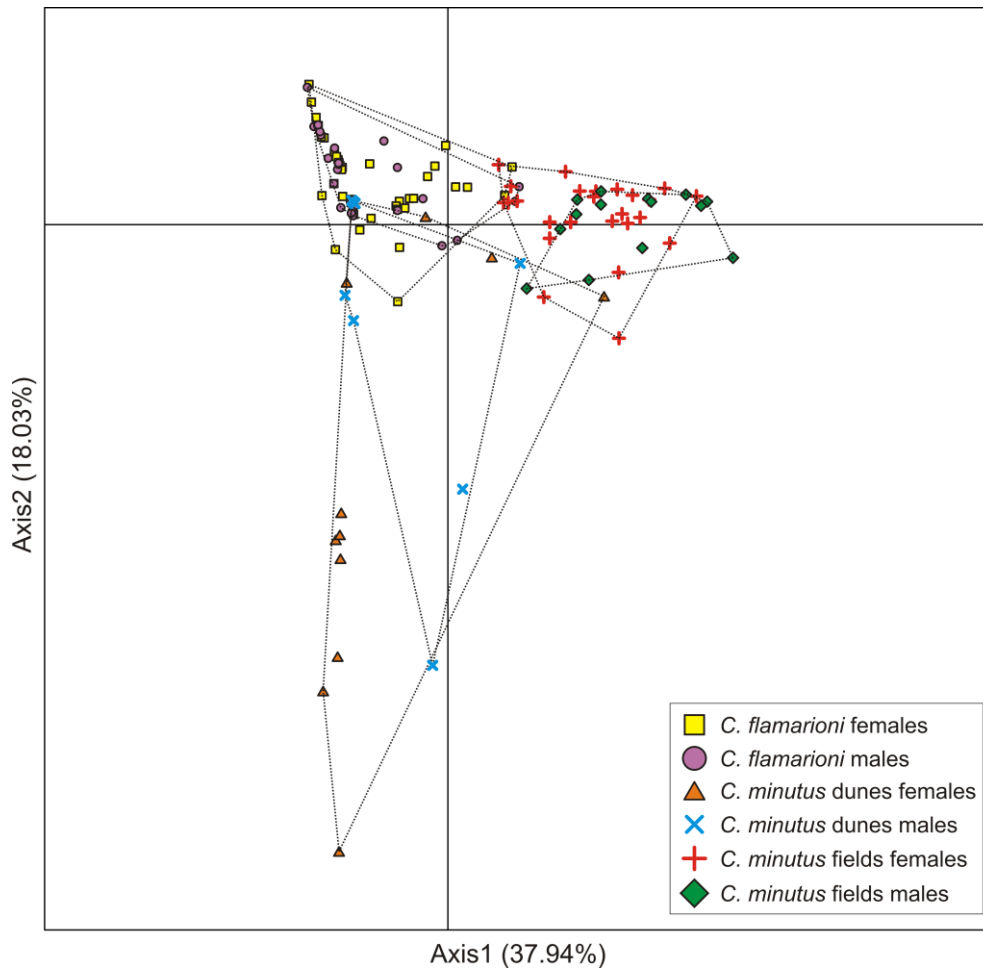

Figure S3. Plots of correspondence analysis for the samples of *C. minutus* (green dots) and *C. flamarioni* (red dots) collected in the sympatric region.

FigureS4. Plot of between-class analysis for samples of male and female individuals for each species in different habitats.
