

TREND Statement Checklist

Paper Section/ Topic	Item No	Descriptor	Reported?	
				Pg #
Title and Abstract				
Title and Abstract	1	Information on how unit were allocated to interventions	Yes	1
		Structured abstract recommended	Yes	2-3
		Information on target population or study sample	Yes	2-3
Introduction				
Background	2	Scientific background and explanation of rationale	Yes	4-6
		Theories used in designing behavioral interventions	NA	
Methods				
Participants	3	Eligibility criteria for participants, including criteria at different levels in recruitment/sampling plan (e.g., cities, clinics, subjects)	Yes	8
		Method of recruitment (e.g., referral, self-selection), including the sampling method if a systematic sampling plan was implemented	Yes	8
		Recruitment setting	Yes	8
		Settings and locations where the data were collected	Yes	8
Interventions	4	Details of the interventions intended for each study condition and how and when they were actually administered, specifically including:		
		○ Content: what was given?	Yes	8
		○ Delivery method: how was the content given?	Yes	8
		○ Unit of delivery: how were the subjects grouped during delivery?	NA	
		○ Deliverer: who delivered the intervention?	Yes	8
		○ Setting: where was the intervention delivered?	Yes	8
		○ Exposure quantity and duration: how many sessions or episodes or events were intended to be delivered? How long were they intended to last?	NA	
		○ Time span: how long was it intended to take to deliver the intervention to each unit?	NA	
○ Activities to increase compliance or adherence (e.g., incentives)	NA			
Objectives	5	Specific objectives and hypotheses	Yes	6
Outcomes	6	Clearly defined primary and secondary outcome measures	Yes	Fig 2-6
		Methods used to collect data and any methods used to enhance the quality of measurements	Yes	9
		Information on validated instruments such as psychometric and biometric properties	No	
Sample Size	7	How sample size was determined and, when applicable, explanation of any interim analyses and stopping rules	No	
Assignment Method	8	Unit of assignment (the unit being assigned to study condition, e.g., individual, group, community)	NA	
		Method used to assign units to study conditions, including details of any restriction (e.g., blocking, stratification, minimization)	NA	
		Inclusion of aspects employed to help minimize potential bias induced due to non-randomization (e.g., matching)	NA	

TREND Statement Checklist

Blinding (masking)	9	<ul style="list-style-type: none"> Whether or not participants, those administering the interventions, and those assessing the outcomes were blinded to study condition assignment; if so, statement regarding how the blinding was accomplished and how it was assessed. 	No	
Unit of Analysis	10	<ul style="list-style-type: none"> Description of the smallest unit that is being analyzed to assess intervention effects (e.g., individual, group, or community) 	Yes	7,9-10
		<ul style="list-style-type: none"> If the unit of analysis differs from the unit of assignment, the analytical method used to account for this (e.g., adjusting the standard error estimates by the design effect or using multilevel analysis) 	NA	
Statistical Methods	11	<ul style="list-style-type: none"> Statistical methods used to compare study groups for primary methods outcome(s), including complex methods of correlated data 	Yes	9-11
		<ul style="list-style-type: none"> Statistical methods used for additional analyses, such as a subgroup analyses and adjusted analysis 	NA	
		<ul style="list-style-type: none"> Methods for imputing missing data, if used 	NA	
		<ul style="list-style-type: none"> Statistical software or programs used 	Yes	9-11
Results				
Participant flow	12	<ul style="list-style-type: none"> Flow of participants through each stage of the study: enrollment, assignment, allocation, and intervention exposure, follow-up, analysis (a diagram is strongly recommended) <ul style="list-style-type: none"> Enrollment: the numbers of participants screened for eligibility, found to be eligible or not eligible, declined to be enrolled, and enrolled in the study Assignment: the numbers of participants assigned to a study condition Allocation and intervention exposure: the number of participants assigned to each study condition and the number of participants who received each intervention Follow-up: the number of participants who completed the follow-up or did not complete the follow-up (i.e., lost to follow-up), by study condition Analysis: the number of participants included in or excluded from the main analysis, by study condition Description of protocol deviations from study as planned, along with reasons 		
			Yes	15
			NA	
			Yes	Table 2
			NA	
			Yes	15
			NA	
Recruitment	13	<ul style="list-style-type: none"> Dates defining the periods of recruitment and follow-up 	Yes	8
Baseline Data	14	<ul style="list-style-type: none"> Baseline demographic and clinical characteristics of participants in each study condition 	Yes	Table 1
		<ul style="list-style-type: none"> Baseline characteristics for each study condition relevant to specific disease prevention research 	NA	
		<ul style="list-style-type: none"> Baseline comparisons of those lost to follow-up and those retained, overall and by study condition 	NA	
		<ul style="list-style-type: none"> Comparison between study population at baseline and target population of interest 	No	
Baseline equivalence	15	<ul style="list-style-type: none"> Data on study group equivalence at baseline and statistical methods used to control for baseline differences 	NA	

TREND Statement Checklist

Numbers analyzed	16	<ul style="list-style-type: none"> Number of participants (denominator) included in each analysis for each study condition, particularly when the denominators change for different outcomes; statement of the results in absolute numbers when feasible 	Yes	15
		<ul style="list-style-type: none"> Indication of whether the analysis strategy was “intention to treat” or, if not, description of how non-compliers were treated in the analyses 	NA	
Outcomes and estimation	17	<ul style="list-style-type: none"> For each primary and secondary outcome, a summary of results for each estimation study condition, and the estimated effect size and a confidence interval to indicate the precision 	Yes	Fig 2-6
		<ul style="list-style-type: none"> Inclusion of null and negative findings 	Yes	Fig 2-6
		<ul style="list-style-type: none"> Inclusion of results from testing pre-specified causal pathways through which the intervention was intended to operate, if any 	NA	
Ancillary analyses	18	<ul style="list-style-type: none"> Summary of other analyses performed, including subgroup or restricted analyses, indicating which are pre-specified or exploratory 	NA	
Adverse events	19	<ul style="list-style-type: none"> Summary of all important adverse events or unintended effects in each study condition (including summary measures, effect size estimates, and confidence intervals) 	NA	
DISCUSSION				
Interpretation	20	<ul style="list-style-type: none"> Interpretation of the results, taking into account study hypotheses, sources of potential bias, imprecision of measures, multiplicative analyses, and other limitations or weaknesses of the study 	Yes	23
		<ul style="list-style-type: none"> Discussion of results taking into account the mechanism by which the intervention was intended to work (causal pathways) or alternative mechanisms or explanations (with regards to statistics) 	Yes	18-23
		<ul style="list-style-type: none"> Discussion of the success of and barriers to implementing the intervention, fidelity of implementation 	NA/no	
		<ul style="list-style-type: none"> Discussion of research, programmatic, or policy implications 	Yes	24-25
Generalizability	21	<ul style="list-style-type: none"> Generalizability (external validity) of the trial findings, taking into account the study population, the characteristics of the intervention, length of follow-up, incentives, compliance rates, specific sites/settings involved in the study, and other contextual issues 	NA/yes	23-24
Overall Evidence	22	<ul style="list-style-type: none"> General interpretation of the results in the context of current evidence and current theory 	Yes	25
