Protocol title: Clinical and prognostic significance of pretreatment plasma D-dimer levels in patients with newly-diagnosed NK/T-cell lymphoma

Protocol version & Date: Version 1.0, 2015-10-03

Informed consent version & Date: Version 1.0, 2015-10-03

Study site & Principle Investigator: Sun Yat-sen University Cancer Center & Wen-qi Jiang

Two IRB members of SYSUCC have expedited review the proposal on 2015/11/10, in accordance to ICH GCP guidelines, government regulations and laws, and agreed to approve this protocol.

Conditions: 1. Do not deviate from, or make changes to study protocol without prior written IRB approval, except when it is necessary to eliminate immediate hazards to research subjects or when the change involves only logistical or administrative issues; 2. Report the following to SYSUCC IRB: (1) study protocol or consent document change, (2) serious adverse event, (3) study progress, and (4) new information that may be relevant to a subject's willingness to continue participation in the study; 3. Report study progress to SYSUCC IRB at a 12-monthly interval until study closure.
