

**Supplemental Table 1 – Clinic and Lab Follow-Up Schedule for Stable Kidney Transplant Recipients**

<b>Post-Transplant Time Period</b>	<b>Laboratory Frequency</b>	<b>Clinic Visit Frequency</b>	<b>Routine Lab Testing<sup>1</sup></b>
0 – 2 weeks	Daily or every other day	Twice weekly	BMP, CBC, Mg, PO4, Tacrolimus, UA <sup>2,3,4</sup>
2 – 4 weeks	Twice a week	Once weekly	
4 – 8 weeks	Once weekly	Every 2 weeks	
8 – 12 weeks	Every 2 weeks	Every 4 weeks	
3 – 6 months	Once Monthly	Every 6 weeks	
6 – 12 months	Once Monthly	Every 3 months	
1 – 2 years	Every 2-3 Months	Every 6 months	
>2 years	Every 4-6 Months	Once yearly	

Footnotes:

1. Protocol biopsies in all patients at 3 months, 1 year and 2 years post-transplant
2. BK PCR schedule: 1, 2, 3, 6, 9, 12, 18 and 24 months post-transplant
3. CMV PCR schedule: Depends on donor/recipient status, antiviral prophylaxis and induction therapy choice
4. Additional labs: other immunosuppressant levels when indicated (cyclosporine, sirolimus, everolimus), hemoglobin A1C every 3-6 months, fasting lipid panel every 6-12 months, spot urine protein/creatinine ratio with all labs for at risk patients, liver function tests yearly, PTH and vitamin D levels in at risk patients
