

S1 Fig. Bronchodilator response, according to *hsa-miR-196a2* alleles in COPD patients. Data are represented as medians. The box defines upper and lower quartiles (25% and 75%, respectively) and the error bars indicate upper and lower adjacent limits. Mann-Whitney test was used. BDRABS absolute change in forced expiratory volume in the first second (FEV1), BDRPRED change in FEV1 as a percent of predicted FEV1, BDRBASE change in FEV1 as a percent of baseline FEV1, all calculations have been explained in detail in the text.
