

STRUCTURAL BIOLOGY
COMMUNICATIONS

Volume 72 (2016)

Supporting information for article:

**Isolation, crystallization and crystal structure determination of
the bovine kidney Na⁺,K⁺-ATPase**

**Jonas Lindholt Gregersen, Daniel Mattle, Natalya U. Fedosova, Poul
Nissen and Linda Reinhard**

Supporting Figures

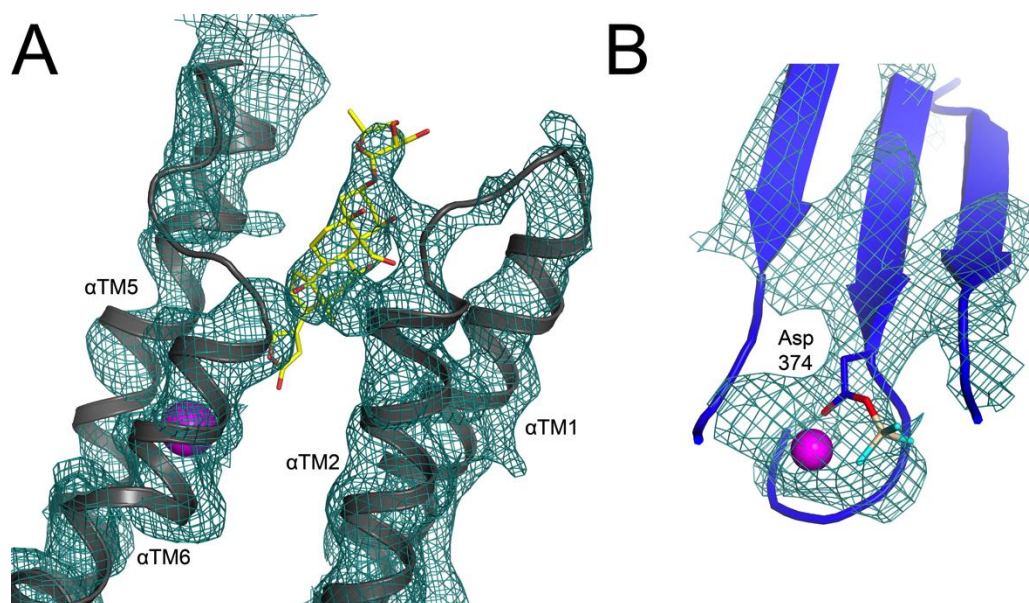

Figure S1 Simple composite omit map (blue mesh) around **A**) the ouabain binding site located at the extracellular side of the α TM domain (in gray) shown at 1.5 r.m.s.d. and **B**) at the BeF_3^- substituted phosphorylation site of Asp374 located in the P-domain shown at 3.5 r.m.s.d.. Magnesium ions are shown in magenta spheres.
