

Supplementary Materials

Table S1. Zero order correlations among maternal, paternal, and combined (maternal and paternal) substance use indices.

	FH Combined	Overall FH Substance Use
M Smoking	.809***	.674***
M Alcohol Use	.679***	.533***
M Illicit Drug Use	.824***	.489***
M Overall Substance Use	-	.804***
P Smoking	.832***	.678***
P Alcohol Use	.873***	.635***
P Illicit Drug Use	.803***	.467***
P Overall Substance Use	-	.854***

Notes: M = maternal; P = paternal; FH = family history; FH Combined refers to the combined (i.e., the average of the maternal and paternal indices) index for the substance listed in the first column.
