Table S2. *Zero order relationships among DD (MCQk), personal substance use, and FH of substance use*

	MCQ*k*	
	Correlation Coefficient	Significance Level
Smoking	.21	.000
Alcohol Use	.07	.051
Marijuana Use	.10	.006
Drug Experimentation	.13	.000
FH of Smoking	.16	.000
FH of Alcohol Use	.09	.014
FH of Illicit Drug Use	.06	.085
Overall FH of Substance Use	.16	.000
Pretax Income	-.17	.000

Notes. FH = family history; Drug Experimentation = number of illicit drugs ever used for those participants who endorsed ever using any illicit drug; MCQ = Multiple Choice Questionnaire; MCQ*k* = average of the three logarithmically transformed *k* values from the standard MCQ.
