Fig. S4. Linear regression of raw data illustrating the relationship between virus prevalence in *Bombus* spp. and *A. mellifera*: (a) All viruses combined (Adj. R^2 = 0.49, p<0.001); (b) BQCV (Adj. R^2 = 0.40, p<0.001); (c) ABPV (Adj. R^2 = 0.39, p<0.001).
