

Supplemental File S1: Further details in relation to information summarized in Tables 3 and 4.

(A). Number of isolates per category in univariate analysis, (B) Histograms of age-group distributions vs. lineages (age ranges 1-20, 21-40, 41-60, 61-80, and >80 years).

(A). Details on number of isolates per category:

Parameters	PGG1 (n=311)	PGG2/3 (n=1768)
Origin		
Foreign-born	102	415
French	33	312
Gender		
Female	129	732
Male	181	1033
Disease localization		
Extra-pulmonary	78	259
Pulmonary	122	688
Drug-susceptibility		
Pansusceptible	114	744
Any drug-resistant	51	127
Age		
Mean	41.30	53.69
Standard deviation	21.63	23.00
Median	37	54
First quartile (25%)	26	33
Third quartile (75%)	55	75

(B). Histograms of age group distributions vs. lineages (age ranges 1-20, 21-40, 41-60, 61-80, and >80 years).
