**Figure S1. *HIST1* downregulation in the donor cells**

A. Heatmap showing relative expression against IVF mean expression at *HIST1* locus in IVF, fSCNT, and the donor cell groups.

B. Heatmap showing relative expression against IVF mean expression of *HIST1* histone genes in IVF, fSCNT, and the donor cell groups.

C. Average expression levels of *HIST1* histone genes in IVF, fSCNT, and the donor cell groups. Error bars indicate standard deviations of replicates.
