	Mean	SEM	Mean	SEM	
Con	100.00	0.00	100.00	0.00	
Ibu	102.10	1.99	99.67	1.35	
Cur	88.65	1.03	85.57	2.85	
Ibu+Cur	83.63	0.82	79.57	0.61	

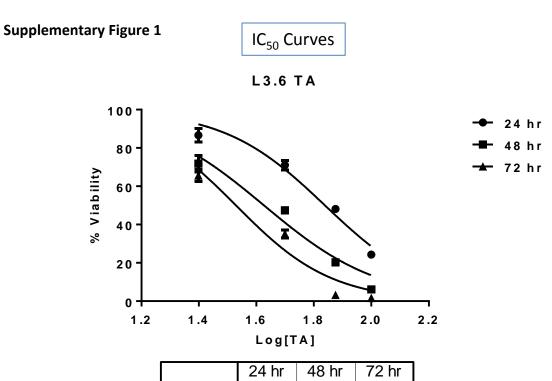

Supplementary Table 2

CUR + TA

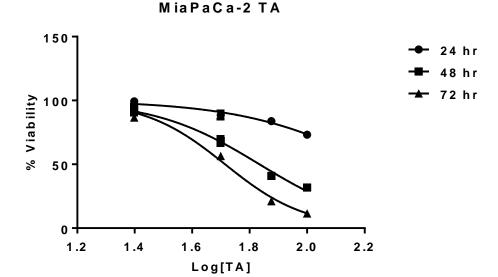

L3.6	24 hr		48 hr		72 hr	
	Mean	SEM	Mean	SEM	Mean	SEM
Control	100.00	0.00	100.00	0.00	100.00	0.00
TA	71.01	2.53	47.46	1.26	35.07	2.08
CUR	85.63	2.40	76.21	3.36	67.26	3.52
TA + Cur	49.03	2.99	28.55	1.21	15.70	0.75

MiaPaCa-2	24 hr		48 hr		72 hr	
	Mean	SEM	Mean	SEM	Mean	SEM
Control	100.00	0.00	100.00	0.00	100.00	0.00
TA	88.60	3.34	68.26	3.70	56.42	1.53
CUR	95.06	0.98	78.42	1.72	82.21	1.71
TA + Cur	91.96	1.80	50.79	1.54	36.73	1.34

Pancreatic cancer cells were treated with vehicle (control) or Ibuprofen (Ibu) or Tolfenamic acid (TA) or Curcumin (Cur) or combination of Cur with Ibu or TA and the cell growth inhibition was measured at indicated time (24/48/72 h post-treatment). Results are presented in % cell viability (Mean and SEM; n=3).

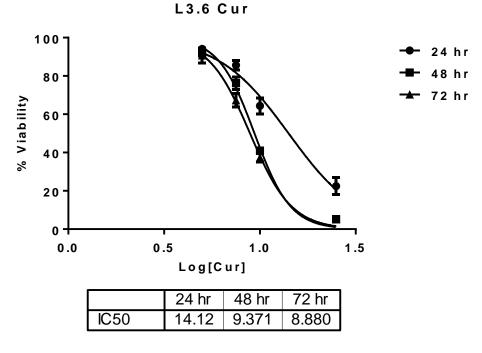

| 24 hr | 48 hr | 72 hr | 1C50 | 68.94 | 42.30 | 33.80 |

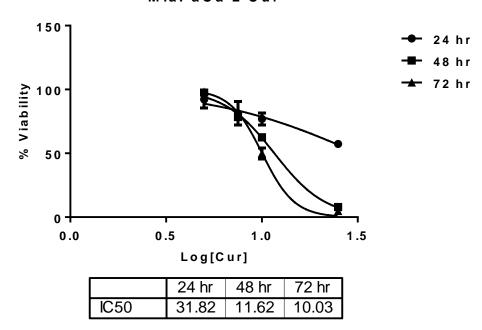

| 24 hr | 48 hr | 72 hr | 1C50 | 174.0 | 68.23 | 51.79

Pancreatic cancer cells were treated with increasing concentrations (μ M) of Tolfenamic acid (TA) and the cell growth inhibition was measured at 24, 48 and 72 h post-treatment. IC₅₀ values were calculated using GraphPad Prizm software.

MiaPaCa-2 Cur

Pancreatic cancer cells were treated with increasing concentrations (μ M) of Curcumin (cur) and the cell growth inhibition was measured at 24, 48 and 72 h post-treatment. IC₅₀ values were calculated using GraphPad Prizm software.
