

Supplementary Figure 1: Differential methylation in methylation clusters 1 - 3. Volcano plot

showing differential methylation of genes between methylation cluster 1 and methylation cluster 2, methylation cluster 1 and methylation cluster 3 and methylation cluster 2 and methylation cluster 3.

The plot displays the difference of the median methylation of a gene plotted against the $-\log_{10}$ unadjusted t-test p-values. Significantly differentially methylated genes ($FDR < 0.05$) are shown in red.
