

Supplemental Figure 3

A

B

Supplemental Figure 3. Transcriptome analyses for MLL-AF9 cells after small molecule inhibitor treatments. **A.** Venn diagram of down (left) and up (right) regulated genes after inhibitor treatments as indicated. Genes with RPKM Log_2 fold change >1 or <-1 were included. **B.** Scatter plot of pair-wise comparison of gene expression changes after inhibitor treatment. Genes with log_2 fold change >1 or <-1 were used.
