

**Figure S9**

**Figure S9** Binding specificity of PBR1 to 5'-UTR regions of the *Ycf1*, *rbcL* and *psaA* transcripts.

- (A) Effect of high concentration of NaCl (150 mM) on the binding activity of PBR1 to 5'-UTR of the *Ycf1* mRNA.
- (B) Binding activity of PBR1 to 5'-UTR of the *Ycf1* mRNA in the presence of increasing amounts of unlabelled 5'-UTR of *rbcL* mRNA as a cold oligonucleotide competitor.
- (C) Binding activity of PBR1 to 5'-UTR of the *rbcL* mRNA in the presence of increasing amounts of unlabelled 5'-UTR of *rbcL* mRNA as a cold oligonucleotide competitor.
- (D) Binding activity of PBR1 to 5'-UTR of the *psaA* mRNA in the presence of increasing amounts of unlabelled 5'-UTR of *psaA* mRNA as a cold oligonucleotide competitor.
