

S1 Datasets

Occurrence records of Peruvian peppertrees in Mexico (geographic coordinates). The datasets below include adult individuals naturally established in the field (Dataset 1), juvenile (non-reproductive) individuals naturally established in the field (Dataset 2), and human-subsidized occurrences in human settlements and field sites where man-planted peppertrees were found (Dataset 3).

Dataset 1. Occurrence records of naturally established adult peppertrees (individuals over 2.0 m tall with flowers and/or fruits) taken in field sites from Mexico.

Occurrence record	Latitude	Longitude
Occurrence 001	21.9796	-101.2886
