

Supplemental File 1:

SPARQL scripts developed for the ODNAE analyses used in the ODNAE manuscript:

Note: Six sets of SPARQL scripts (20 individual scripts in total) were generated for the ODNAE study. All the four sets of SPARQL scripts were stored in the ODNAE Github folder:

<https://github.com/odnae/odnae/tree/master/docs/SPARQL>

The contents of these six sets of 20 SPARQL scripts are provided below:

The content of SPARQL File 1:

Title: **query_G_protein_linked_receptor_interaction_drugs**

Script:

- **1.1.** SPARQL query for searching the ODNAE drugs annotated with G-Protein-linked Receptor Interactions [MoA] (N0000000152) and its subclasses.

The content of SPARQL File 2:

Title: **query_agonists_antagonists**

- **2.1.** drugs link to agonist
- **2.2.** The agnoist that links to ODNAE drugs
- **2.3.** drugs and agonist pair:
- **2.4.** drugs link to antagonist
- **2.5.** The antagnoist that links to ODNAE drugs
- **2.6.** Antagonist and drugs pair
- **2.7.** drug link to both a kind of agonist and antagonist
- **2.8.** query drugs that have a specific role, e.g., Serotonin Agonists [MoA]. (used for Fig. 6)

The content of SPARQL File 3:

Title: **query_all_drug_with_MoAs**

- **3.1.** SPARQL query for searching all ODNAE drugs link to MoAs : subClassOf http://purl.obolibrary.org/obo/ODNAE_0000002 (role in cellular and molecular interactions)

The content of SPARQL File 4:

Title: **query_neurotransmitters_interaction_drugs**

- **4.1.** SPARQL query for searching the ODNAE drugs annotated with Neurotransmitter Transporter Interactions [MoA] N0000000105) and its subclasses.
- **4.2.** # SPARQL query for searching the ODNAE drugs annotated with Dopamine Transporter Interactions [MoA] N0000000219) and its subclasses.
- **4.3.** SPARQL query for searching the ODNAE drugs annotated with Norepinephrine Transporter Interactions [MoA] (N0000000234) and its subclasses.
- **4.4.** SPARQL query for searching the ODNAE drugs annotated with Serotonin Transporter Interactions [MoA] (N0000000167) and its subclasses.

The content of SPARQL File 5: **(Note: The file to be generated)**

Title: **link_chemicals_and_drugs**

- **5.1.** identify the drugs having proper part of chemical elements

- **5.2.** identify all ancestor CHEBI terms of CHEBI_9667 (Triamcinolone)
- **5.3:** get drugs for all child levels of a parent CHEBI term
- **5.4.** Goal: get drugs for all levels of chebi terms --> #2 cleanup

SPARQL File 6: (Note: The file to be generated)

Title: **link_drugs_Chebi_AEs**

- **6.1:** This is to find drugs vs AEs that are associated with these drugs.
- **6.2:** This is to find AE and related drugs for the AE.
- **6.3:** This is to identify chebi chemical terms for a specific AE. (Note: This is the script used to generate data for heatmap.)

The Content of SPARQL file 1:

Script file name: **query_G_protein_linked_receptor_interaction_drugs**

Content:

#part of results:

callret-0	label_targetchebi	chebi_for_drug	drug	labeldrug
http://purl.obolibrary.org/obo/CHEBI_33582	carbon group molecular entity	http://purl.obolibrary.org/obo/CHEBI_63581	http://purl.obolibrary.org/obo/DRON_00023447	Stavudine Oral Capsule
http://purl.obolibrary.org/obo/CHEBI_33582	carbon group molecular entity	http://purl.obolibrary.org/obo/CHEBI_127780	http://purl.obolibrary.org/obo/DRON_00025587	Foscarnet Injectable Solution
http://purl.obolibrary.org/obo/CHEBI_33582	carbon group molecular entity	http://purl.obolibrary.org/obo/CHEBI_44915	http://purl.obolibrary.org/obo/DRON_00026059	Propofol Injectable Suspension

Note: removed this line: ?chebi_for_drug rdfs:label ?label_chebi .

Why: because the label_chebi can have duplicate names for the same chebi.

SPARQL 6.2: This is to find AE and related drugs for the AE.

#Note: an AE (e.g., ciprofloxacin hydrochloride (Ciloxan, Cipro, Cetraxal)-associated peripheral neuropathy AE or ODNAE_0000023) may have two superclasses, e.g., peripheral neuropathy AE, and drug-associated peripheral neuropathy adverse event. And this AE ‘has participant’ some ‘Ciprofloxacin Oral Tablet’.

```

Notes:

- Some drugs are not associated with AEs. For example, DRON_00022253 -- Levodopa Oral Tablet are not associated with any AEs.
- Some drugs may have two AEs, for example, DRON_00022291 - lomefloxacin Oral Tablet
