

**Different prognostic value of circulating and disseminated tumor cells in primary breast cancer. Influence of bisphosphonate intake?**

Sabine Kasimir-Bauer<sup>1</sup>, Katharina Reiter<sup>1</sup>, Bahriye Aktas<sup>1</sup>, Ann-Kathrin Bittner<sup>1</sup>, Stephan Weber<sup>2</sup>, Thomas Keller<sup>2</sup>, Rainer Kimmig<sup>1</sup>,

\*Oliver Hoffmann<sup>1</sup>.

**Running title: Effect of bisphosphonate intake on minimal residual disease**

**Table 1a Absolute and relative frequencies of PFS event occurrence by DTC status by menopausal status and bisphosphonate intake**

Menopausal status	DTC status	Events	Bisphosphonate intake		Total (%)
			No (%)	Yes (%)	
premenopausal	negative	no event	34 (91,9)	0 (0)	34 (91,9)
		event	3 (8,1)	0 (0)	3 (8,1)
	positive	no event	5 (83,3)	22 (75,9)	27 (77,1)
		event	1 (16,7)	7 (24,1)	8 (22,9)
pre-/perimenopausal	negative	no event	70 (93,3)	3 (100)	73 (93,6)
		event	5 (6,7)	0 (0)	5 (6,4)
	positive	no event	12 (92,3)	39 (81,3)	51 (83,6)
		event	1 (7,7)	9 (18,8)	10 (16,4)
postmenopausal	negative	no event	195 (87,1)	7 (58,3)	202 (93,6)
		event	29 (12,9)	5 (41,7)	34 (6,4)
	positive	no event	27 (90,0)	101 (87,1)	128 (83,6)
		event	3 (10,0)	15 (12,9)	18 (16,4)

**Table 1b 1a Absolute and relative frequencies of OS event occurrence by DTC status by menopausal status and bisphosphonate intake**

Menopausal status	DTC status	Events	Bisphosphonate intake		
			No (%)	Yes (%)	Total (%)
premenopausal	negative	no event	35 (94,6)	0 (0)	35 (94,6)
		event	2 (5,4)	0 (0)	2 (5,4)
	positive	no event	5 (83,3)	27 (93,1)	32 (91,4)
		event	1 (16,7)	2 (6,9)	3 (8,6)
pre-/perimenopausal	negative	no event	72 (96)	3 (100)	75 (96,2)
		event	3 (4)	0 (0)	3 (3,8)
	positive	no event	12 (92,3)	45 (93,8)	57 (93,4)
		event	1 (7,7)	3 (6,3)	4 (6,6)
postmenopausal	negative	no event	204 (91,1)	10 (83,3)	214 (90,7)
		event	29 (8,9)	2 (16,7)	22 (9,3)
	positive	no event	26 (86,7)	106 (91,4)	132 (90,4)
		event	4 (13,3)	10 (8,6)	14 (9,6)

**Table 1c Absolute and relative frequencies of PFS event occurrence by menopausal status for DTC+/CTC- and bisphosphonate intake**

Menopausal status	Events	Bisphosphonate intake		
		No (%)	Yes (%)	Total (%)
premenopausal	no event	1 (100)	10 (83,3)	11 (84,6)
	event	0 (0)	2 (16,7)	2 (15,4)
pre-/perimenopausal	no event	6 (100)	20 (87,0)	26 (89,7)
	event	0 (0)	3 (13,0)	3 (10,3)

**Table 1d Absolute and relative frequencies of OS event occurrence by menopausal status for DTC+/CTC- and bisphosphonate intake**

Menopausal status	Events	Bisphosphonate intake		
		No (%)	Yes (%)	Total (%)
premenopausal	no event	1 (100)	11 (91,7)	12 (92,3)
	event	0 (0)	1 (8,3)	2 (7,7)
pre-/perimenopausal	no event	6 (100)	21 (91,3)	26 (93,1)
	event	0 (0)	2 (8,7)	3 (6,9)
